SQL Project Title:
Medical Data History Analysis
Using SQL.

Author: Srigopikaa M P

Email: srigopikaa@gmail.com

Introduction about the Dataset

The Medical Data History Analysis project focuses on analyzing healthcare-related data stored in a relational database. The database contains information about patients, doctors, hospital admissions, and provinces.

The analysis is performed using SQL queries to identify meaningful patterns and insights related to patient demographics, hospital admissions, departments, allergies, doctor workload, and geographical distribution.

Introduction about the Dataset

The **Medical Data History dataset** is a healthcare database consisting of four relational tables:

Patients, Administration, Doctors, and Province Names.

These tables provide information about patients, hospital admissions, doctors, diagnoses, allergies, and patient locations.

- Patients Table:** Contains patient demographic and medical information such as patient ID, name, gender, birth date, city, province ID, allergies, height, and weight.

- Administration Table:** Contains hospital admission records, including patient ID, admission date, discharge date, diagnosis, and attending doctor ID.

- Doctors Table:** Contains doctor information such as doctor ID, first name, last name, and specialty.

- Province Names Table:** Contains province IDs and their corresponding province names.

The tables are connected through common identifiers such as **patient ID, doctor ID, and province ID**, enabling analysis of **patient details, admission patterns, diagnoses, allergies, doctor workload and availability, and province-wise healthcare distribution** using SQL.

Task-1: Show first name, last name, and gender of patients who's gender is 'M'

Query:

```
select first_name,last_name,gender
from patients_table
where gender="m";
```

Output:

	first_name	last_name	gender
▶	Donald	Waterfield	M
	Mickey	Baasha	M
	Jiji	Sharma	M
	Blair	Diaz	M
	Charles	Wolfe	M
	Thomas	ONeill	M
	Sonny	Beckett	M
	Cedric	Coltrane	M
	Hank	Spencer	M
	Rick	Bennett	M
	Woody	Bashir	M
	Tom	Halliwell	M
	John	West	M
	Jon	Doggett	M

Note : The image might show only part of the results as its representative only 4

Task-2: Show first name and last name of patients who does not have allergies

Query:

```
select first_name,last_name
from patients_table
where allergies="";
```

Output:

	first_name	last_name
▶	Donald	Waterfield
	Blair	Diaz
	Thomas	ONeill
	Sonny	Beckett
	Cedric	Coltrane
	Hank	Spencer
	Sara	di Marco
	Amy	Leela
	Rachel	Winterbourne
	John	West
	Jon	Doggett
	Angel	Edwards
	Brodie	Beck
	Nea	Kobayakawa
	Laura	Halliwell
	Lucille	Maureen

Note : The image might show only part of the results as its representative only 5

Task-3: Show first name of patients that start with the letter 'C'.

Query:

```
select first_name  
from patients_table  
where first_name like 'c%';
```

Output:

	first_name
▶	Charles
	Cedric
	Charles
	Cross
	Calleigh
	Catherine
	Caroline
	Casanova
	Chen
	Charmian
	Cary
	Christine
	Carol
	Corrado
	Cordelia
	Claire
	Carol
	Cordelia

Note : The image might show only part of the results as its representative only 6

Task-4: show first name and last name of patients that weight within the range of 100 to 120 (inclusive).

Query:

```
select first_name,last_name from
patients_table where
weight>=100 and weight<=120;
```

Output:

	first_name	last_name
▶	Catherine	Minoru
	Sam	Spratt
	Carol	Wylie
	Billie	Lowell
	Hannah	MacLeod
	Roberta	Leone
	Bill	Erin
	Hal	Travis
	Ryan	Umbridge
	Blanche	Jovanovic
	Eve	Hughes
	Henry	Fairweather
	Will	Harvey
	Sally	Fowler
	Tru	West
	Wade	Hill
	Georgette	Lambert
	Jonah	McCoy
	Bill	Russo
	Miguel	Fabray
	Kiyone	Wildhack
	Shirley	Webster

Note : The image might show only part of the results as its representative only 7

Task- 5: Update the patients table for the allergies column. If the patient's allergies is null then replace it with 'NKA'.

Query:

```
set sql_safe_updates = 0;
update patients_table_copy
set allergies = 'NKA'
where allergies = '';
```

Output:

	patient_id	first_name	last_name	gender	birth_date	city	province_id	allergies	height	weight
▶	1	Donald	Waterfield	M	12/02/1963	Barrie	ON	NKA	156	65

	Amy	Leela	Ontario
	Woody	Bashir	Ontario
	Tom	Halliwel	Ontario
	Rachel	Winterbo...	Ontario

Note : The image might show only part of the results as its representative only 10

Task- 8. Show how many patients have a birth_date with 2010 as the birth year.

Query:

```
select count(patient_id) as count_patient  
from patients_table  
where RIGHT(birth_date, 4)=2010;
```

Output:

	count_patient
▶	55

Note : The image might show only part of the results as its representative only 11

Task-9:show the first_name, last_name, and height of the patient with the greatest height.

Query:

```
select first_name,last_name,
height
from patients_table
where height=(select max(height)
from patients_table);
```

Output:

	first_name	last_name	height
▶	Sam	Haruko	226

Note : The image might show only part of the results as its representative only 12

Task- 10: Show all columns for patients who have one of the following patient_ids: 1,45,534,879,1000.

Query:

```
select * from patients_table  
where patient_id in (1,45,534,879,1000);
```

Output:

	patient_id	first_name	last_name	gender	birth_date	city	province_id	allergies	height	weight
▶	1	Donald	Waterfield	M	12/02/1963	Barrie	ON		156	65

Task-30: show the difference between the largest weight and smallest weight for patients with the last name 'Maroni'.

Query:

```
select max(weight) - min(weight) as diff
from patients_table
where last_name='Maroni';
```

Output:

	diff
▶	71

Note : The image might show only part of the results as its representative only 33

Task-31: show all of the days of the month (1-31) and how many admission_dates occurred on that day. Sort by the day with most admissions to least admissions.

Query:

```
select
day(str_to_date(admission_date, '%d/%m/%y')) as
admission_day,
count(*) as total_admissions
from administration_table
group by day(str_to_date(admission_date,
'%d/%m/%y'))
order by total_admissions desc;
```

Output:

	admission_day	total_admissions
▶	11	180
	4	179
	9	179

Note : The image might show only part of the results as its representative only 34

Task-32:show all of the patients grouped into weight groups. Show the total amount of patients in each weight group. Order the list by the weight group decending.E.G. If they weight 100 to 109 they are placed in the 100 weight group, 110-119 = 110 weight group, etc.

Query:

```
select truncate(weight, -1) as weight_group,  
       count(*) as total_patients  
from patients_table  
group by truncate(weight, -1)  
order by weight_group desc;
```

Output:

	weight_group	total_patients
▶	140	6
	130	59
	120	191
	110	426
	100	507

	30	126
	20	165
	10	114
	0	92

Note : The image might show only part of the results as its representative only 35

Task-33: Show patient_id, weight, height, isobese from the patients table. Display isobese as a boolean 0 or 1. Obese is defined as $\text{weight(kg)} / (\text{height(m)})$. Weight is in units kg. Height is in units cm.

Query:

```
select patient_id, height, weight, bmi,  
case when bmi >= 30 then 1 else 0 end as isobese  
from  
(select patient_id,height,weight,weight /  
power(height / 100, 2) as bmi from patients_table)  
as p;
```

Output:

	patient_id	height	weight	BMI	isObese
▶	1	156	65	26.709401709401707	0

Note : The image might show only part of the results as its representative only 36

Task-34: Show patient_id, first_name, last_name, and attending doctor's specialty. Show only the patients who has a diagnosis as 'epilepsy' and the doctor's first name is 'lisa'. Check patients, admissions, and doctors tables for required information.

Query:

```
Select
  p.patient_id,p.first_name,p.last_name,d.specialty
from patients_table p
left join administration_table a
on p.patient_id= a.patient_id
left join doctors_table d
on a.attending_doctor_id=d.doctor_id
where a.diagnosis='Epilepsy' and d.first_name='Lisa';
```

Output:

patient_id	first_name	last_name	specialty
468	Frank	Anderson	Obstetrician/Gynecologist
701	Precious	Ashton	Obstetrician/Gynecologist

Note : The image might show only part of the results as its representative only 37
